TECHNICAL WRITER | EDUCATOR | UX ENGINEER

DEVELOPER EDUCATION PORTFOLIO

Hello, Turing World Podcast Feature - May 2024

In my appearance on “Hello, Turing World”, I shared insights about UX engineering, discussing the process of setting up component libraries and how my educational background contributes to my success. I also discussed the challenges and rewards of establishing a new UX Engineering team.

UX Engineering and Design Systems - February 2024

This presentation was intended for students at Turing School of Software and Design in the front end engineering program. I hosted a lunch and learn for students to get a basic idea of the fundamentals of UX Engineering and design systems. Note that the recording is a dry run since, at the time of creating this portfolio, the session had not happened yet.

Web Typography Demo for Vivian Health - February 2023

This short demonstration was recorded for web engineers at Vivian Health after the UX Engineering team updated the typography components. It was intended to be brief and informative, addressing frequently asked questions and proactively addressing pain points as designers worked to update legacy designs to use the new components.

UX Onboarding for Vivian Health - August 2022

After a series of new hires, I worked with the UX Engineering team lead to put together a presentation for onboarding new engineers and familiarizing them with our front end principles and UX resources and expectations. This is a longer presentation that was done collaboratively with my team lead.
